NORTHSTAR GRID ANALYTICS LTD.

FY2025 Earnings Brief

M0.0 TEST FIXTURE

YEAR ENDED DECEMBER 31, 2025

Reliable growth in grid intelligence

Northstar Grid Analytics Ltd. is a fictional software company created solely for deterministic document-ingestion, retrieval, and citation testing.

REVENUE

$184.2M

+22.0% year over year

ANNUAL RECURRING REVENUE

$201.6M

+24.4% year over year

CUSTOMERS

412

+61 net additions

NET RETENTION

118%

+3 percentage points

Executive summary

Demand remained strongest among regional utilities modernizing outage planning and distributed-energy forecasting. Subscription expansion and implementation services supported growth, while infrastructure optimization improved operating leverage.

FIXTURE NOTICE

All entities, figures, events, quotations, risks, and outlook statements in this document are invented. They do not describe a real issuer or security.

Financial Performance

M0.0 TEST FIXTURE

Full-year results

Growth was led by subscription expansion, new utility deployments, and higher demand for scenario-modeling services.

PRIMARY ACCEPTANCE EVIDENCE

FY2025 revenue was $184.2 million, up 22.0% from $151.0 million in FY2024.

This sentence is the exact citation target defined in the fixture manifest.

Metric	FY2025	FY2024	Change
Revenue	**$184.2M**	**$151.0M**	**+22.0%**
Annual recurring revenue	$201.6M	$162.0M	+24.4%
Adjusted operating income	$28.7M	$18.1M	+58.6%
Adjusted operating margin	15.6%	12.0%	+3.6 pts
Free cash flow	$24.9M	$16.4M	+51.8%

Revenue composition

Adjusted measures in this synthetic brief are included only to make the fixture resemble a realistic earnings document. They are not based on audited statements or a recognized reporting framework.

Operations and Outlook

M0.0 TEST FIXTURE

Operating review

Northstar ended FY2025 with 412 customers, including 67 utility customers using at least three product modules. The company processed 9.4 billion synthetic grid observations during the fourth quarter and reported platform availability of 99.95%.

UTILITY CUSTOMERS	MULTI-MODULE	PLATFORM UPTIME
156	67	99.95%
+18%	+34%	+0.03 pts

FY2026 outlook

For FY2026, Northstar expects revenue between $218 million and $226 million and adjusted operating margin between 17% and 19%. The outlook assumes continued customer expansion and no material change in foreign-exchange conditions.

FORWARD-LOOKING STATEMENT NOTICE

The outlook is fictional and exists to test temporal eligibility, conflicting-evidence handling, and citation behavior. It must never be interpreted as a forecast for a real company.

Product modules

- **Forecast Studio** — Demand and renewable-output scenario modeling.
- **Outage Intelligence** — Asset-risk ranking and restoration planning.
- **Grid Exchange** — Controlled data collaboration across utility teams.

Risks and Fixture Notes

M0.0 TEST FIXTURE

Selected fictional risks

1

Customer concentration

The ten largest customers represented 31% of FY2025 revenue. Contract timing could produce uneven quarterly results.

2

Data availability

Product performance depends on timely and accurate operational data supplied by customers and integration partners.

3

Infrastructure costs

Higher observation volumes may increase cloud-processing costs before optimization benefits are realized.

Fixture design notes

- The PDF contains a real text layer and fixed page boundaries.
- The primary revenue evidence appears exactly once, on page 2.
- The document intentionally contains no information about a declared dividend.
- All names and numeric values are synthetic and internally consistent.

Rights and use

This original synthetic fixture contains no third-party source material. To the extent possible under law, the content is dedicated to the public domain under CC0 1.0. It may be copied, modified, and redistributed for testing and demonstration.
